

Project Management

- Project Set-up
- Project Management

Complex projects in a maritime environment – such as automation projects on container terminals or multi-disciplinary research tasks – require specific management skills and experience in order to focus all available resources on the objective and to meet timelines and budget ceilings. HPC can provide specialists in this field who were trained in various terminal construction and conversion projects with our parent company HHLA and in various international projects.

Project Set-up

- Definition of objectives
- Project budgeting
- Forming of project teams and assignment of personnel
- Support in contract negotiations
- Scheduling
- Definition of evaluation schemes

Project Management

- Day-to-day project management and implementation
- Monitoring of schedules
- Optimisation of resources
- Budget and cost control
- Quality assurance
- Auditing
- Project documentation
